

We help our clients achieve business and cost containment objectives through **IT staffing solutions** and by providing the **expertise, processes, and tools** necessary to maximize productivity and create competitive advantage.

Over the course of the last 36 years, COMSYS has continuously evolved in response to client needs with enhanced service lines, expanded presence, and flexible, client-centric delivery models.

IT STAFFING SOLUTIONS

On demand delivery of contract IT resources and project/program managers

Short-term and long-term IT staffing services across entire spectrum of skill sets and domain expertise

Contract-to-Hire and Permanent Placement

MANAGED SOLUTIONS

Infrastructure & Data Solutions: a complete range of services related to the critical infrastructure which supports an organization's enterprise data.

Development Solutions: aligning technology with our clients' business needs and the practical application of technology in meeting business objectives. From helping our clients implement a tactical technology solution to assisting them in development of a strategy from the ground up and managing their entire program through fruition, Development Solutions provides a practical foundation for IT.

Global Enterprise Content Management: solutions spanning the content value chain from strategy and authoring to translation and management.

Business Intelligence: leveraging years of experience to design and implement efficient BI programs and applications that enable customers to access data that facilitates better decision making and results, for a true competitive advantage.

Analytics/SAS: COMSYS' SAS practice is a SAS Gold Partner with more than 20 years of SAS consulting and clinical programming support experience.

ERP: comprehensive services across the ERP selection, implementation, and management spectrum - SAP Gold Consulting Partner.
